RP could lose papaya market—Greenpeace

Greenpeace has warned that the Philippines could lose its papaya market to the United States if the country does not meet the required standards for pesticide residues.

The organization has issued a report stating that the Philippines' current pesticide use is not in line with the United States' requirements. This could result in the suspension of the Philippines' export privileges for papayas.

Greenpeace has urged the Philippine government to take immediate action to reduce pesticide use and meet the required standards.

Hawaii, Isabela pact to ease flow of nurses

MANILA, Jan. 10 (AP)—The Philippine Nurses Association and the Hawaii Nurses Association have reached a tentative agreement to ease the flow of nurses between the two countries.

The pact, which was signed in Manila, calls for the two associations to work together to address the shortage of nurses in both countries. It also calls for the two associations to establish a joint committee to monitor the situation and to make recommendations to the respective governments.

The agreement is seen as a significant step towards resolving the long-standing issue of nurse migration. It is hoped that the pact will help to stabilize the nursing workforce in both countries and to ensure that patients receive the best possible care.

'Captain Barbell' needs to fight for redemption

Review

By [illegible] and [illegible]

It's a shame that the first movie in the series, *Captain Barbell*, is so bad. The film is a comedy about a man who becomes a superhero after a car accident. The movie is full of clichés and bad acting. It's a waste of time.

JP Morgan downgrades RP rating

Bank's debt assessment reduced to 'medium' from 'overweight'

By [illegible]

JP Morgan Chase & Co. has downgraded its rating of Republic of the Philippines (RP) from 'overweight' to 'medium' in its latest assessment of the country's debt. The downgrade reflects the bank's concerns over the RP's economic performance and its ability to service its foreign debt. The bank's assessment is based on the RP's recent economic growth, inflation, and foreign exchange reserves. The downgrade is a reflection of the bank's ongoing monitoring of the RP's economic situation and its impact on the country's debt obligations.
